

TECHNICAL DATA SHEET

LANDORA ALGAE AND MOLD REMOVER

An effective detergent that removes and protects against algae and mold. Can also be used to remove moss and lichen. The product is suitable for most outdoor surfaces that have growth on them.

First try the product on a small part of the surface to be treated, and avoid application of surfaces heated by sunlight or covered by frost.

Environmental considerations: Surplus liquid is not to be disposed of in common drains. Any surplus liquid and the container is to be handed in to your local recycling station.

Directions for use

- 1. Make sure the surface is free from leaves, twigs and clumps of moss.
- 2. Protect windows, glass sections and other items that may be damaged by alkaline products, e.g. aluminium. Also protect the garden vegetation.
- 3. Spray Landora Algae and Mold Remover on the surface to be treated. Let it soak for approx. 24 hours.
- 4. Remove any residue with a high-pressure cleaner or with a brush.

The master painter suggests: For the best results, perform the treatment when it is dry and hasn't rained for a few days.

Technical data

Solution, ready to use.

Consumption: approx. 5-10 m²/litre.

Application: Spray or brush.

The product is available in the following amounts:

1.0 litre

2.5 litre
