

TECHNICAL DATA SHEET

LANDORA OUTDOOR STAIN

Alkyd oil based stain with water solvent for outdoor woodwork. Accentuates the natural grain of the wood. Gives a water-repellent surface and is resistant to cracking. Protects against UV radiation. May also be used indoors. In such case, the drying time may be prolonged.

NB! Do not use the product on horizontal surfaces. New and untreated wood must be treated with 14 days of erection. Do not paint of a surface heated by sunlight or late in the day if there is a risk for dew.

NB! Stir thoroughly. Minor differences in colour may occur with different batch numbers. If you have products with different batch numbers, we recommend that you mix the various batches to achieve uniformity.

Environmental considerations: Surplus product is not to be disposed of in common drains. Surplus product, the container and any cleaning liquid is to be handed in to your local recycling station.

Directions for use

Stir well before use and frequently during application.

1. Wash with Landora Facade Cleaner (remember to protect the windows). Leave to dry before applying the second coat.
2. Repeat the procedure at least once in order to obtain a satisfactory result. If you have to stop application, stop in a corner or at a joint.

Tip: To get a better result, first apply a coat of Landora Outdoor Stain Clear, and then apply the desired stain. Use clear stain every other coat if you want a lighter colour.

Technical data

Consumption: Planed wood, approx. 6-8 m²/litre, unplaned wood, approx. 4-5 m²/litre.

Drying time at 20°C: approx. 6-8 hours. The second coat may be applied after approx. 24 hours.
